Moreover, we have Infrastructure functions, which perform control and service functions and, in particular, tasks relating to Group-wide, divisional resource-planning, steering and control, as well as tasks relating to risk, liquidity and capital management which form part of the Corporate & Other segment. CB combines Deutsche Bank's Corporate Finance and Global Transaction Banking Businesses with the latter providing cash management, trade finance and securities services, delivering the full range of commercial banking products and services for both corporates and institutions worldwide. IB is focusing on Origination & Advisory as well as Fixed Income & Currencies. PB corporate division combines the bank's expertise in private banking and Wealth Management in one corporate division. The market risks subject to the capital charge requirements are the risks pertaining to interest rate related instruments in the trading book, the risks pertaining to equities in the trading book and the risks pertaining to foreign exchange position (including gold positions) across the bank.

The Colombo Branch's Market Risk RWA is attributable to the Interest Rate Risk of our Securities in the Trading Book as well as FX Risk on our open Foreign Exchange position.
